# In emergencies, the MyNumber card protects you and your family!

Since its launch in 2016, the MyNumber Card has expanded its functions greatly. Full-scale operation of its function as a health insurance card began in October 2021, and this October, the card is now also available for emergency care.

## Benefits of the MyNumber Card Emergency Care Function:

### 1. Accurate Medical Info for EMTs

Even if you collapse and can't speak, emergency teams can quickly access details such as your regular doctor and current medications.

### 2. Faster Transport and Care

By having access to your details through the MyNumber card, EMTs can choose the right hospital and provide prompt first aid.

### 3. Hospitals Can Prepare Ahead

Receiving accurate medical data before arrival helps hospitals start treatment faster.

## Benefits of the MyNumber Health Insurance Card:

### 1. Secure Sharing of Medical Records

Past treatments and prescriptions are securely shared with doctors and pharmacists, ensuring proper care.

### 2. Automatic High-Cost Coverage

No need to pay beyond the limit at hospitals or pharmacies—this system applies the cap automatically.
